

Faculty of Medicine

The Akita University Faculty of Medicine consists of two departments: the School of Medicine and the School of Health Sciences. The School of Medicine contributes to society by training doctors, and the School of Health Sciences by training nurses, public health nurses, midwives, physical therapists, and occupational therapists. Since it was founded in 1970, it has taught more than 6,000 graduates and has been at the forefront of medical care not only in Akita Prefecture but throughout Japan, and has been active as a leader in various fields of the medical world.

This is a turbulent period for Japan. People's lives and health are threatened by annually occurring earthquakes and heavy rains, and this year by the new coronavirus pandemic. The declining birthrate and aging population is an inexorable process, and the shortage of doctors and nurses in rural areas is becoming ever more acute. This is an era that calls for strength and resourcefulness from all of our students. We aspire to do our best together to contribute to Japan's medical care, medical science, health and welfare.

Faculty Organization

School of Medicine

Producing future leaders of the medical field, excelling in specialist knowledge and expertise.

School of Health Sciences

The Health Sciences Department has 3 majors: nursing, physical therapy, and occupational therapy. There are also 3 courses students may choose from: nursing, public health nurses, midwives, physical therapists, and occupational therapists. These courses are offered in order to train specialists in the medical field.

School of Medicine	Students are guided by three lecturers from the Doctoral Course in Medicine Cooperative Division over a course of 39 lectures.
