

Faculty of Medicine

We are training talented students who are able to maintain an international perspective and who can contribute to people's health and welfare. We do this by first making sure that our students have a broad educational background rooted in the humanities. Our students are flexible and adaptable allowing them to adjust accordingly to the ever advancing fields of medicine and health-care. Over time our students develop an ability to solve problems, and a firm understanding of medical and health sciences. Other than working as a medical professional in a clinical setting, the door to continue on into graduate school to become a researcher or instructor, or any number of other advanced specialists in the medical field is opened upon graduation.

Faculty Organization

School of Medicine

Producing future leaders of the medical field, excelling in specialist knowledge and expertise.

School of Health Sciences

The Health Sciences Department has 3 majors: nursing, physical therapy, and occupational therapy. There are also 6 courses students may choose from: nursing, public health nurses, midwives, physical therapists, and occupational therapists. These courses are offered in order to train specialists in the medical field.

School of Medicine	The faculty from the graduate school leads instruction.
