

Faculty of Medicine

We are training talented students who are able to maintain an international perspective and who can contribute to people's health and welfare. We do this by first making sure that our students have a broad educational background rooted in the humanities. Our students are flexible and adaptable allowing them to adjust accordingly to the ever advancing fields of medicine and health-care. Over time our students develop an ability to solve problems, and a firm understanding of medical and health sciences. Other than working as a medical professional in a clinical setting, the door to continue on into graduate school to become a researcher or instructor, or any number of other advanced specialists in the medical field is opened upon graduation. We contribute to the medical treatment, health care and welfare of the future, and seek students who are willing to contribute to the development of medical and health science.

Faculty Organization

School of Medicine

Producing future leaders of the medical field, excelling in specialist knowledge and expertise.

School of Health Sciences

The Health Sciences Department has 3 majors: nursing, physical therapy, and occupational therapy. There are also 6 courses students may choose from: nursing, public health nurses, midwives, physical therapists, and occupational therapists. These courses are offered in order to train specialists in the medical field.

School of Medicine	Students are guided by three lecturers from the Doctoral Course in Medicine Cooperative Division over a course of 39 lectures.
