問３　I think teachers need to look at many different ways of teaching and choose their best features so that they can help their students to learn in the best possible way. My first-year English teacher in senior high school taught every lesson the exact same way. I could understand what he was teaching, but my friend could not, so I had to help her a lot. However, in my second year, we had a different teacher and she used many different ways of teaching us. Sometimes my friend and I could both understand her lesson, and other times only one of us understood it, so we could help each other. I realized that my friend and I learn differently, so when our teacher changed her way of teaching, even though she could not help all of the students all of the time, she could help most of the students most of the time. So, I like it when teachers do different activities in class. (164 words)
